TECHNICAL IMPLEMENTATION SPECIALIST • SENIOR FIELD SERVICE ENGINEER • FIELD SERVICE TECHNICIAN

Information & Storage Management • Databases • Disaster Recovery

CI/CD • IaaS • SaaS • AWS • Azure

PROFESSIONAL EXPERIENCE

TECHNICAL IMPLEMENTATION SPECIALIST

- Drive nationwide technical implementations, managing critical software deployments for environments generating \$1bn+ in quarterly revenue.
- Utilize CI/CD pipelines and automation to streamline software delivery without service interruption.
- Manage complex network protocols including routing, DNS, and subnets to ensure secure connectivity between on-premises and cloud resources.
- Standardize security protocols through the configuration of multi-factor authentication (MFA) to meet enterprise security standards.
- Maintain up to date knowledge of SQL, JavaScript, & Python
- Retrieve logs and debug information to determine points of failure during deployment and operation

SENIOR FIELD SERVICE ENGINEER

- Designed and deployed enterprise-grade datacenter solutions and hyperconverged infrastructure (VBlock, Isilon, Powermax) tailored for high-availability production environments.
- Led the transition from traditional storage to vSAN/SAN solutions, establishing configurations for data replication and disaster recovery.
- Specialized in VMWare cloud solutions, providing a foundation for hybrid-cloud integrations and workload migrations.
- Troubleshoot complex hardware and connectivity issues involving CISCO/Dell switches and fiber optic/SFP infrastructure.

FIELD SERVICE TECHNICIAN

- Work closely with casino house managers to determine problematic cabinets
- Utilize network operations center (NOC) to remotely troubleshoot and deploy solutions across 5000 cabinets
- Repair mechanical and electrical components
- Diagnose and troubleshoot Windows & Linux OS faults in cabinets and office PC's
- Maintain documentation of all repairs and parts used
- Maintain daily log of all machines visited, diagnosis and troubleshooting steps
